Latest and Most Accurate Cisco 300-370 Dumps Exam Questions and Answers:

Version 8.0

Question: 21

Two 5508 Wireless Lan Controllers are managing all Access Points throughout the network. The WLCs are located in different locations to provide geographical redundancy. A Mobility Group has been configured on both WLCs and has a UP status on both Controllers. The APs in location A are statically configured to use Controller A as the Primary and Controller B as the Secondary. If the WLC in location A goes offline, the APs successfully join the WLC in location B but they do not failover to their Primary configured Controller. What configuration task will fix this issue?

- A. Change the AP Failover Priority to critical.
- B. Enable AP Fallback globally on the WLC.
- C. Configure the WLC in location A as Primary using the CAPWAP AP Controller IP Address command on all the location A Access Points.
- D. Use DHCP Option 43 and specify WLC in location A as Primary.

Answer : C

Question: 22
